

High-Speed Needle Feed Lockstitch Sewing Machine

This is a high-speed needle feed lockstitch sewing machine. Its needle feed mechanism ensures uniform material feeding for secure and durable seams.

Overview

High-Speed Needle Feed Lockstitch Performance

The GC0518 series is engineered for high-speed, precision lockstitch operations in professional textile and apparel production environments. Featuring a specialized needle feed mechanism, this machine ensures uniform material handling, effectively preventing slippage and distortion during the sewing process. Designed for durability and consistent quality, it is an ideal solution for mass production tasks such as seaming and hemming.

Key Features

Primary Applications

- Apparel Manufacturing
- Textile Production
- Seaming
- Hemming

Stitching Capabilities

Lockstitch, Needle Feed, High-Speed Operation

Performance Metrics

Operation Speed

High-Speed

Feed Type
