

High-Speed Needle Feed Lockstitch Sewing Machine

This high-speed, single-needle, needle-feed flatbed lockstitch sewing machine is designed for efficient and precise sewing operations. The needle-feed mechanism ensures consistent stitch quality and prevents slippage of fabric layers.

Product Overview

High-Performance Sewing Solution

This high-speed single-needle, needle-feed flatbed lockstitch sewing machine is engineered for maximum efficiency and precision in industrial sewing environments. Its robust construction ensures exceptional durability and stability, even during high-speed operation. The advanced needle-feed mechanism guarantees consistent stitch quality by effectively preventing slippage between fabric layers, making it an ideal choice for diverse apparel and textile manufacturing applications.

Technical Specifications

Feed Mechanism	Needle Feed
Stitch Type	Lockstitch
Bed Type	Flatbed
Number of Needles	1

Safety & Compliance

Operational Precautions

- Avoid loose clothing near machine
- Remove dangling objects or jewelry
- Disconnect power before threading
- Disconnect power before cleaning or servicing
- Disconnect power before needle change

Safety Compliance

Safety Devices Required, Eye Protection Required, Ear Protection Required, Face Protection Required
