

High-Speed Overlock Sewing Machine

This high-speed overlock sewing machine is designed for efficient and precise fabric edge finishing. Its multi-thread system creates durable and professional seams, while adjustable stitch length and width accommodate various fabric types.

Overview

Industrial High-Speed Overlock Efficiency

This super high-speed overlock sewing machine is expertly engineered for professional fabric edge finishing and precision seam creation. Designed for demanding industrial environments, it offers a multi-thread system and adjustable stitch parameters to accommodate a wide variety of fabric types. Robust construction paired with advanced features like differential feed and automatic lubrication ensures both long-term reliability and consistent output quality.
