

High-Speed Overlock Sewing Machine

This high-speed overlock sewing machine is designed for efficient and precise edge finishing. It features adjustable stitch length and width, along with a built-in lubrication system.

Overview

High-Speed Overlock Efficiency

This high-speed overlock sewing machine is expertly engineered to deliver precise edge finishing on a diverse range of fabric types. Designed to enhance throughput in professional apparel manufacturing and textile processing, it ensures consistent quality through advanced mechanical control systems. Its robust construction and integrated lubrication facilitate long-term reliability in demanding industrial environments.

Performance Specifications

Key Performance Metrics

8800

Series Model

8803

Model Variant

Core Features

- Adjustable stitch length
- Adjustable stitch width
- Differential feed system to prevent fabric puckering
- Built-in lubrication system

Certifications & Compliance

Industry Application

Apparel Manufacturing, Textile Processing, Industrial Sewing
