

High-Speed Overlock Sewing Machine

This high-speed overlock sewing machine is designed for manufacturing garments, shoes, and accessories. It features robust construction for continuous operation and adjustable settings for various fabric types.

Overview

High-Speed Industrial Overlock Machine

This high-speed overlock sewing machine is engineered for professional garment, shoe, and accessory manufacturing environments. Designed for continuous, heavy-duty operation, it features robust construction and precise stitching mechanisms to ensure consistent quality across various fabric types and thicknesses. Its adjustable settings provide the flexibility needed to maintain high efficiency and reliability in demanding production workflows.

Key Features

Model Identifier	BSW500-UT
Suitable Applications	Garment Manufacturing, Shoe Production, Accessories Manufacturing

Performance Metrics

Operation Type

High-Speed • Industrial Grade

Construction

- Robust frame for continuous operation
- Precise stitching mechanism
- Adjustable settings for varied fabric thickness
