

High-Speed Overlock Sewing Machine for Garments and Shoes

This high-speed overlock sewing machine is designed for garment, shoe, and accessory manufacturing. It is engineered for efficient and precise stitching, ensuring high-quality production in apparel and textile applications.

Overview

High-Speed Industrial Overlock Solution

This high-speed overlock sewing machine is engineered for precision and efficiency in garment, shoe, and accessory manufacturing. Designed to handle demanding production environments, it ensures consistent, high-quality stitching for a variety of textile applications. Its robust construction and adjustable settings offer the reliability and flexibility required for professional apparel production lines.

Technical Specifications

Key Performance Features

- High-speed operation
- Robust industrial build
- Adjustable settings
- User-friendly interface

Model Number	BSO-747F-512MI-25/LFC2
Series	747F / BSL-747
Suitable Applications	Garments, Shoes, Accessories, Textiles
