

High-Speed Overlock Sewing Machine for Garments and Shoes

This high-speed overlock sewing machine is designed for manufacturing garments, shoes, and accessories. It features adjustable settings for different fabric types and thicknesses, making it suitable for seaming, hemming, and edging applications.

Product Overview

High-Speed Industrial Overlock Machine

This high-speed overlock sewing machine is expertly engineered for the rigorous demands of garment, shoe, and accessory manufacturing. Designed for continuous industrial operation, it offers precise stitching capabilities and adjustable settings to handle a wide range of fabric types and thicknesses. The machine ensures durable, professional-grade finishes for seaming, hemming, and edging applications, effectively preventing fraying and enhancing product quality.

Technical Specifications

Industry Compatibility

Garments • Shoes • Accessories

Key Operational Features

- High-speed performance
- Robust construction for continuous operation
- Adjustable settings for various fabric thicknesses
- Multi-thread and looper configuration
- Professional overlock stitch quality

Model Number	HQ10-5A-8
Primary Applications	Seaming, Hemming, Edging
