

High-Speed Overlock Sewing Machine for Garments and Shoes

This high-speed overlock sewing machine is designed for garment, shoe, and accessory manufacturing. The industrial sewing machine is engineered for efficient and precise overlocking, providing durable and professional seams.

Overview

High-Speed Overlock Solution

The FN-700-4 is a high-speed overlock sewing machine engineered specifically for the garment, shoe, and accessory manufacturing industries. Designed for demanding production environments, this machine delivers efficient and precise overlocking to create durable, professional-grade seams. Its robust construction ensures long-term reliability and consistent high-quality finishing across a wide variety of textile materials.

Technical Specifications

Model Number	FN-700-4
Suitable Applications	Garment Manufacturing, Shoe Production, Accessories, Textile Industry

Performance

Key Performance Metrics

700

Series Designation

Construction Quality

- Robust industrial-grade construction
- Designed for high-speed operation
- Engineered for demanding production environments
- Durable seam finishing
