

High-Speed Passenger Train, 160 km/h

This high-speed train is designed for passenger transport, reaching speeds of 160 km/h. It features an aerodynamic design and comfortable interiors for an efficient travel experience.

Overview

High-Speed Passenger Transport Solution

This high-speed passenger train is engineered for efficient and reliable transit, capable of reaching speeds of 160 km/h. Its streamlined aerodynamic design is optimized for performance and passenger comfort during travel. Designed specifically for passenger transport, this unit combines modern aesthetics with functional engineering to meet the demands of high-speed rail operations.

Performance

Maximum Operating Speed

160 km/h
Max Speed

Identification

Model Identifier

PT01001A

Design & Aesthetics

Design Features

Aerodynamic, Streamlined, Blue and white livery, Red undercarriage
