

High-Speed Plastic Bag Making Machine

This high-speed machine is designed for efficient production of various types of plastic bags. It features automated film feeding, sealing, cutting, and stacking mechanisms.

Overview

High-Speed Plastic Bag Production

This high-speed plastic bag making machine is engineered for the efficient, automated production of various bag types, including flat and T-shirt designs. It features a robust control system that allows for precise adjustments of bag length, width, and sealing temperature to meet specific production requirements. Designed with a modular architecture and a stable, vibration-resistant frame, it ensures consistent performance and simplified maintenance for industrial environments.

Technical Capabilities

Key Components

- Film unwinding unit
- Sealing unit with temperature control
- Cutting unit with adjustable blade
- Stacking conveyor

Production Metrics

1 Included

Automated Stacking

1 Precision

Temperature Control

Safety & Design

Design Features

Modular design • Robust frame • Vibration reduction

Safety Features

Emergency stop buttons, Safety guards

Applications

Compatible Bag Types

- Flat bags
- T-shirt bags
- Custom bag designs
