

High-Speed Plastic Bag Making Machine

This high-speed plastic bag making machine is designed for efficient production of various types of plastic bags. It features automatic feeding, sealing, cutting, and stacking mechanisms.

Overview

High-Performance Bag Production

This high-speed plastic bag making machine is engineered for the efficient, high-volume production of various plastic bag types, including flat bags and T-shirt bags. It features a fully integrated system for automatic feeding, sealing, cutting, and stacking, all managed by a programmable logic controller (PLC) for precision. Built with durable materials to ensure long-lasting performance, this machine minimizes maintenance requirements while maximizing output capacity.

Technical Specifications

Automation Capabilities

- Automatic Feeding
- Automatic Sealing
- Automatic Cutting
- Automatic Stacking

Control System

Programmable Logic Controller (PLC)

Compatible Bag Types

Flat Bags, T-shirt Bags, Custom Designs

Performance Metrics

Key Performance Metrics

1 Yes

Adjustable Bag Dimensions

1 Yes

Variable Sealing Temperature
