

High-Speed Plastic Bag Making Machine

This high-speed machine is designed for efficient production of plastic bags. It features automatic sealing and cutting, adjustable bag length and width, and a user-friendly control panel.

Overview

High-Speed Efficiency

This high-speed automatic bag making machine is engineered for the efficient production of various plastic bag types. Designed for high-volume environments, it features advanced PLC controls for precision and consistency. The system handles multiple thermoplastic materials with ease, ensuring minimal waste and optimal throughput.

Technical Specifications

Key Features

- Automatic feeding, sealing, cutting, and stacking
- Programmable Logic Controller (PLC) for precise control
- Adjustable bag length and width
- Adjustable tension control
- Advanced sensors for length control
- Automatic fault detection

Safety Systems

Emergency Stop • Protective Guards

Supported Materials

PE, PP, Thermoplastic Films

Performance Metrics

Performance Highlights

1 Automatic

Production Mode

100 %
