

High-Speed Steel Annular Cutter

This high-speed steel annular cutter is designed for drilling large diameter holes in steel. It features a multi-tooth cutting edge and a slug ejection system for efficient material removal and clean, accurate holes.

Product Overview

High-Speed Steel Annular Cutter

This high-speed steel annular cutter is engineered specifically for drilling large diameter holes in steel materials. It features a multi-tooth cutting edge designed for efficient material removal and includes a slug ejection system to ensure clean, accurate results. It is an ideal tooling solution for use in magnetic drills and other rotary cutting equipment.

Technical Details

Key Features

- Multi-tooth cutting edge
- Efficient material removal
- Slug ejection system
- High-speed steel construction

Material	High-Speed Steel
Compatible Equipment	Magnetic Drills, Rotary Cutting Tools
