

High-Speed Steel Auger Bit for Woodworking

This high-speed steel auger bit is designed for drilling clean, precise holes in wood. The bit features a self-feeding screw point for effortless drilling and a wide flute design for efficient chip removal.

Product Overview

High-Speed Steel Auger Bit

This high-speed steel auger bit is engineered for precision drilling in woodworking applications. It features a self-feeding screw point that ensures effortless penetration and a wide flute design optimized for rapid and efficient chip removal. It is an ideal tool for professionals working in framing, decking, and furniture manufacturing.

Technical Details

Material	High-Speed Steel (HSS)
Key Features	Self-feeding screw point, Wide flute design, Clean hole drilling

Applications

Suitable Applications

- Framing
- Decking
- Furniture making

Availability

Size Range

Various diameters • Various lengths
