

High-Speed Steel Circular Saw Blade 250 x 1.0 x 32

This high-speed steel circular saw blade is designed for precision cutting. It features a durable construction and optimized tooth geometry for efficient material removal and extended blade life.

Product Overview

Precision Cutting Performance

This high-speed steel circular saw blade is engineered for precision and efficiency in industrial cutting applications. Featuring robust construction and an optimized tooth geometry, it ensures effective material removal and extended operational life. It is a versatile tool suitable for processing a wide range of materials, including various metals and plastics.

Technical Specifications

Blade Diameter	250 mm
Blade Thickness	1 mm
Bore Diameter	32 mm
Material	HSS-DM05 (High-Speed Steel)

Performance Features

Key Advantages

- Optimized tooth geometry for efficient cutting
- Durable high-speed steel construction
- Extended blade service life
- Precision engineering for clean cuts

Suitable Materials	Metal, Plastic
