Product Overview

Professional High-Speed Steel Counterbore Set

This high-speed steel counterbore set is engineered for creating clean, consistent holes for fasteners across a variety of materials including steel, aluminum, and plastic. Featuring a fixed guide for fine tolerance and multiple flutes for chatter-free operation, these tools ensure precise alignment and efficient chip evacuation. The set is designed for professional metalworking and woodworking applications where accuracy and extended tool life are paramount.

Technical Specifications

Material

HSS (High-Speed Steel)

Manufacturing Standard

DIN 373

Flute Configuration

Multiple flutes for chatter-free operation

Shank Type

Cylindrical shank

Set Contents

Included Metric Sizes

M3, M4, M5, M6, M8, M10

Performance & Application

Key Features

- Fixed guide for fine tolerance
- Efficient chip evacuation
- Extended tool life
- Secure chucking and precise alignment

Compatible Materials

Steel, Aluminum, Plastic, Wood
