

High-Speed Steel Drill Bit

This high-speed steel drill bit is designed for drilling into various materials including metal, wood, and plastic. The bit features a spiral flute design for efficient chip removal and reduced friction.

Product Overview

High-Performance HSS Drilling

This High-Speed Steel (HSS) drill bit is engineered for precision and durability in demanding industrial applications. It is specifically optimized for drilling into challenging materials, including stainless steel, spring steel, and mould steel. With its robust construction and efficient spiral flute design, this tool ensures reliable chip removal and extended service life for professional machining tasks.

Technical Specifications

Material Grade

HSS • M2

Maximum Material Hardness

35 HRC

Hardness Rating

Compatible Materials

- Steel
- Stainless Steel
- Spring Steel
- Special Steel
- Steel Block
- Mould Steel
- Wood
- Plastic

Design Features

Spiral Flute, Hardened Cutting Edge, Wear Resistant

Usage

Compatible Tools

- Power Drills
- Drill Presses
- Hand Drills
