Product Overview

Professional Grade High-Speed Steel Hacksaw Blades

These high-speed steel (HSS) hacksaw blades are engineered for demanding metalworking applications. Constructed from M2 material, the blades feature an all-hard design that provides exceptional durability and rigidity for precise, efficient cutting. They are capable of slicing through a variety of machinable metals, including stainless steel and structural materials, making them a reliable choice for industrial and professional use.

Technical Specifications

Blade Construction

All Hard • High-Speed Steel

Material M2 High-Speed Steel (HSS)

Dimensions 12" x 1/2"

Available TPI 18 TPI, 24 TPI, 32 TPI

Logistics & Packaging

Packaging Options

- 100 pieces per plastic box
- 1000 pieces per carton

Customization

- Custom color options available
- OEM branding support
- Flexible packaging requests
