

# High-Speed Steel Nut Tap

This high-speed steel nut tap is designed for machine use. It features a straight flute design and standard thread form, suitable for tapping nuts and internally threaded components in materials like steel, aluminum, and plastic.

## Overview

### High-Speed Steel Nut Tap

This high-speed steel nut tap is engineered specifically for efficient machine tapping operations. Designed with a straight flute configuration and precision-ground threads, it ensures consistent and accurate results when threading nuts and other internally threaded components. It is a versatile tool suitable for processing a wide range of materials, including steel, aluminum, and plastic.

## Technical Specifications

### Usage

Machine Use

Material	High-Speed Steel (HSS)
Flute Type	Straight Flute
Compatible Materials	Steel, Aluminum, Plastic
