

High-Speed Steel Slitting Saw Blade

This high-speed steel slitting saw blade is engineered for precision metal cutting. It features a toothed edge for efficient material removal and a central mounting hub for secure attachment.

Product Overview

Precision Cutting Performance

This high-speed steel (HSS) slitting saw blade is engineered for precision metal cutting applications. Featuring a specialized toothed edge, it ensures efficient material removal and clean cuts. The blade includes a durable coating on the outer edge, designed to enhance wear resistance and reduce friction during operation, making it a reliable choice for demanding industrial environments.

Technical Specifications

Material	HSS-DMo5 (High-Speed Steel with Molybdenum)
Diameter	250 mm
Thickness	1 mm
Bore Diameter	32 mm

Features

Key Features	High-Speed Steel, Wear-Resistant Coating, Precision Toothed Edge, Industrial Grade
