

# High-Speed Steel Slitting Saw Blade

This high-speed steel slitting saw blade features fine teeth for precision cutting. The spiral design ensures efficient chip removal and reduced friction.

## Product Overview

### Precision Slitting Solution

This high-speed steel slitting saw blade is engineered for precision cutting across a variety of metals and specialized materials. It features a fine-tooth configuration and a specialized spiral design that significantly improves chip removal while minimizing friction during operation. It is an ideal choice for high-accuracy environments, including professional machining and jewelry fabrication.

## Technical Specifications

### Primary Applications

- Metal Machining
- Jewelry Making
- Precision Cutting

Material	High-Speed Steel (HSS)
Design Features	Fine Teeth, Spiral Design, Precision Cut

## Performance Highlights

### Key Benefits

Efficient Chip Removal • Reduced Friction
