

High-Speed Steel Twist Drill Bits

High-speed steel twist drill bits are designed for drilling holes in various materials. The drill bits feature a helical flute design for efficient chip removal and are suitable for use in power drills and drill presses.

Product Overview

High-Speed Steel Twist Drill Bits

These professional-grade twist drill bits are engineered from high-speed steel (HSS), providing excellent durability and heat resistance for demanding drilling tasks. Featuring a precision-ground helical flute design, they ensure efficient chip evacuation to prevent clogging during operation. They are versatile tools compatible with both standard power drills and stationary drill presses, suitable for a wide range of industrial and workshop applications.

Technical Specifications

Material	High-Speed Steel (HSS)
Design Features	Helical Flute, Efficient Chip Removal, Precision Ground

Compatibility

Compatible Equipment

- Power Drills
- Drill Presses
