Product Overview

High-Speed Thermal Printing Solution

This high-speed thermal printer is engineered for efficient receipt and label production in retail and hospitality environments. It features robust Ethernet connectivity for seamless integration into existing POS systems and supports multiple network protocols. With an adjustable cutter, audible beep confirmation, and a user-friendly indicator interface, it ensures reliable performance for demanding printing applications.

Connectivity & Networking

Configurable Network Settings

- IP Address
- Netmask
- Gateway
- DHCP Status

Supported Protocols

Ethernet, 10Base/100Base, TCP/IP

Functional Features

Device Controls & Indicators

- Paper Feed Button
- Power Indicator Light
- Error Indicator Light
- Paper Status Indicator
- Audible Beep Confirmation

Cutter Maintenance

The device includes an integrated cutter lock protection. If the cutter becomes locked, the front cover should be opened to manually adjust the cutter for safe operation.

Cutter Functionality

Yes
