

High-Strength Plow Bolt

These plow bolts are manufactured in diameters from 3/8" to 1-3/8" and lengths up to 17". They are suitable for use in Grade 10.9 or Grade 12.9 applications.

Product Overview

High-Strength Plow Bolts for Heavy Machinery

These high-strength plow bolts are engineered for secure fastening in demanding earthmoving and construction equipment applications. Featuring a square neck and countersunk head design, they ensure blades and cutting edges are held firmly in place for optimal operational performance. Available in multiple head styles and high-grade materials, these components provide exceptional durability and resistance to wear in harsh environments.

Technical Specifications

Diameter Range	3/8" to 1-3/8"
Maximum Length	17 in
Available Grades	Grade 10.9, Grade 12.9

Design Features

Head Designs

Flat Head • Domed Head • Countersunk

Neck Type	Square Neck
