Product Overview

High-Strength Woven Vehicle Tow Rope

This heavy-duty woven tow rope is designed for professional vehicle recovery and emergency towing applications. Constructed from high-strength synthetic polypropylene webbing, it offers superior resistance to abrasion, stretching, and UV damage. The inclusion of robust steel hooks with safety latches ensures a secure connection, while the woven construction provides excellent load distribution to minimize fraying under high tension.

Technical Specifications

Recommended Use

- Vehicle emergency rescue
- Off-road recovery
- General-purpose hauling
- Roadside assistance

Material Composition

High-strength polypropylene tape

Hook Material

Heavy-duty steel with safety latches

Key Features

Wear-resistant, UV-resistant, Reinforced stitching, High-visibility
