

High Tensile Dee Shackle for Lifting

This high tensile dee shackle is designed for heavy-duty lifting and rigging. It is constructed from high-strength alloy steel for maximum durability and reliability.

Product Overview

High Tensile Dee Shackle

This high tensile dee shackle is engineered for demanding heavy-duty lifting and rigging applications. Constructed from high-strength alloy steel, it offers exceptional durability and reliability in harsh environments. The design features a secure screw pin closure, making it an ideal connection point for chains, ropes, and various lifting accessories in marine, industrial, and construction settings.

Technical Specifications

Material	High-strength alloy steel
Closure Mechanism	Screw pin
Suitable Environments	Marine, Industrial, Construction

Compliance & Safety

Standards Compliance
Industry Standard Compliant
