## Product Overview

### High-Tension Frame Saw

This high-tension frame saw is engineered for efficient cutting of wood, plastic, and bone. Featuring a durable tubular steel frame, it ensures optimal blade tension and stability during operation. The ergonomic handle design reduces user fatigue, while the quick-release mechanism allows for rapid and easy blade changes, making it suitable for both professional and DIY applications.

## Technical Specifications

### Usage Suitability

Professional • DIY

Frame Material	Tubular Steel
Blade Mechanism	Quick-release
Suitable Materials	Wood, Plastic, Bone

## Design Features

Handle Design	Ergonomic grip
Frame Color	Green
