

High-Torque Automotive Starter Motor

This high-performance starter motor is designed for reliable engine starting. It delivers high torque output for quick and efficient starts, even in cold weather.

Overview

High-Performance Automotive Starter

This high-torque automotive starter motor is engineered for reliable and efficient engine ignition under diverse operating conditions. It features a robust solenoid, a durable drive mechanism, and heavy-duty components designed to withstand the demands of rigorous automotive applications. Built for long-lasting performance and quick starts, this unit ensures dependability even in cold weather environments.

Technical Specifications

Key Features

- Robust solenoid assembly
- High-torque output design
- Durable internal drive mechanism
- Heavy-duty carbon brushes
- Precision-engineered armature
