

High Velocity Air Mover for Drying

This high velocity air mover delivers a high volume of airflow for rapid drying of surfaces. Its compact design and multiple speed settings provide flexibility for various drying applications.

Product Overview

High-Performance Drying Solution

This high-velocity air mover is engineered for rapid and efficient drying across a variety of demanding environments, including water damage restoration, janitorial services, and construction sites. Featuring a robust motor and high-volume airflow, it effectively dries carpets, floors, and walls with ease. The unit's compact, lightweight design and integrated handle ensure excellent portability, while its durable construction is built to withstand rigorous daily use.

Performance & Features

Key Performance Metrics

3 levels

Speed Settings

Ideal Applications

Water Damage Restoration, Janitorial Services, Construction Sites, Surface Drying

Design & Build

Design Features

- Compact and lightweight form factor
- Integrated carrying handle
- Heavy-duty construction for demanding environments
- Multi-speed adjustment capability

Portability

Easy Maneuverability • Lightweight
