

High-Velocity Industrial Floor Fan

This is a high-velocity industrial floor fan designed for powerful air circulation. It features durable metal construction with a safety grill, adjustable tilt, and a multi-speed control for customized airflow.

Overview

High-Velocity Industrial Performance

This high-velocity industrial floor fan is engineered for powerful air circulation in demanding environments. Featuring durable metal construction and a protective safety grill, it is built to withstand rigorous daily use. With adjustable tilt and multi-speed controls, this unit provides customizable airflow, making it an ideal solution for cooling large workshops, garages, and commercial spaces.
