

High-Velocity Oscillating Floor Fan

This oscillating floor fan features a durable metal construction and quality motor. It is suitable for use in high humidity and temperature environments, with brushless DC options available for increased efficiency.

Product Overview

High-Velocity Air Circulation

These high-velocity fans are engineered with elegant, durable metal construction and high-quality motors designed for demanding environments. They are ideal for spaces with high humidity and temperature, delivering robust airflow up to 7500m³/h. Available in multiple configurations, including efficient brushless DC options, these fans provide reliable performance for professional ventilation needs.

Performance Metrics

Maximum Air Volume

7500 m³/h
Max Air Volume

Motor Technology

Standard AC, Brushless DC Option

Technical Specifications

Model Specifications

Model	Voltage (V)	Input Power (W)	Rotation (RPM)	Air Volume (m ³ /h)
HVOFF-45B	230	120	1300	1800
HVOFF-35	230	120	1300	1050
HVOFF-40	230	120	1300	1500

Application

Suitable Environments

- High humidity areas
- High temperature environments
- Industrial workspaces
