

High-Velocity Pedestal Fan with Adjustable Height

This high-velocity pedestal fan is designed for powerful air circulation. It features a robust motor, durable construction, and adjustable height for optimal airflow direction.

Overview

High-Velocity Air Circulation

This high-velocity pedestal fan is engineered for powerful air circulation in demanding environments. Featuring a robust motor and durable construction, it delivers consistent performance for industrial, commercial, and residential spaces. The adjustable height and multiple speed settings allow for precise control over airflow intensity and direction, ensuring optimal comfort and ventilation.

Performance

Speed Settings	3 levels
Airflow Type	High-Velocity

Design & Build

Adjustability

- Adjustable Height
- Directional Airflow Control

Construction Material	Metal
Safety Features	Protective Metal Cage, Stable Pedestal Base

Applications

Suitable Environments

Industrial • Commercial • Residential
