

High-Velocity Personal Fan with Adjustable Airflow

This high-velocity fan provides powerful air circulation for personal cooling. It features adjustable airflow and multiple speed settings for customized comfort.

Overview

High-Velocity Air Circulation

This high-velocity floor fan is engineered for powerful and efficient air circulation in both residential and commercial settings. It features a versatile design with adjustable height and a 360-degree uniform air supply system to ensure consistent cooling. With advanced safety features like motor over-temperature protection and customizable wind modes, it provides a comfortable and reliable solution for climate control.

Performance

Speed Settings	9 stalls
Wind Modes	Natural Wind, Sleeping Wind, Normal Wind
Timer Duration	7.5 hours

Features

Key Features

- Remote control operation
- Touch-sensitive controls
- Motor over-temperature safety protection
- Photocatalyst air purification
- Vitamin absorption air function

Design

Airflow Coverage

360 degrees
