Product Overview

High-Velocity Cooling Solution

This high-velocity tripod cooling fan is engineered for powerful air circulation in demanding environments such as workshops, warehouses, and commercial halls. It features a robust motor with three adjustable speed settings and integrated over-heat protection for safe, reliable operation. The unit is designed for versatility, offering a collapsible tripod base for space-saving storage and a long power cord for flexible placement.

Performance & Technical

Speed Settings	3 levels
Blade Structure	4-blade optimized aluminum-iron ABS or Aluminum structure

Safety & Features

Safety Features	Over-heat protection, Low noise operation, Safety cage
-----------------	--

Design & Usability

Control Interface	Wall-mounted speed control switch
Space Saving	Yes

Applications

Recommended Use

- Dining rooms
- Shopping malls
- Workshops
- Warehouses
- Halls
