

High-Velocity Wall-Mount Fan

This high-velocity wall-mount fan is designed for powerful air circulation in various settings. It features adjustable tilt and swivel for directional airflow and a reinforced steel wire guard for safety.

Overview

High-Performance Air Circulation

This high-velocity wall-mount fan is engineered to provide powerful air circulation across industrial, commercial, and residential environments. Featuring a robust motor and precision-balanced blades, it delivers exceptional cooling and ventilation performance. The unit's adjustable tilt and swivel design allows for precise directional control, while its space-saving wall-mount configuration ensures efficient use of floor area.
