Product Overview

Professional Grade Barricade Tape

This high-visibility barricade tape is engineered for effective hazard warning and area restriction in demanding environments. Constructed from durable, non-adhesive laminated polypropylene film, it offers robust performance for temporary safety applications. Available in both high and low-density options, this tape is fully customizable to meet specific project requirements for length and width.

Material & Construction

Adhesive Properties

Non-adhesive

Material Composition

Laminated polypropylene film

Density Options

High Density, Low Density
