

High-Visibility DC Beacon Light

This beacon light provides high visibility in various applications. It operates on a 12-36V DC power supply and is built for reliable performance in demanding environments.

Product Overview

High-Visibility Warning Solution

This DC beacon light is engineered for high-visibility signaling in demanding professional environments. Featuring 30 integrated LEDs and a durable Din-pole mounting system, it provides a reliable warning signal for emergency and construction vehicles. Its wide voltage range ensures compatibility across various equipment platforms, offering a versatile safety solution.

Technical Specifications

Operating Voltage

12 V

Min Voltage

48 V

Max Voltage

| | |
|--------------|--------|
| LED Quantity | 30 pcs |
| Power Source | DC |

Design & Mounting

Mounting Style

Din-pole

Build Quality

- Durable construction for demanding environments
- High-visibility lens design
- Integrated warning signal functionality

Applications

| | |
|--------------------|--|
| Ideal Applications | Emergency Vehicles, Construction Equipment, Industrial Warning, Safety Signaling |
|--------------------|--|

Safety & Compliance

| | |
|----------------|----------------------|
| Safety Notices | Caution High Voltage |
