

High-Visibility Knitted Safety Vest

This high-visibility safety vest is designed for optimal material, light weight, and breathability. It features high-intensity reflection for enhanced visibility in low-light conditions and is suitable for various applications requiring safety and visibility.

ADDITIONAL IMAGES

Overview

Professional High-Visibility Safety Solution

This high-visibility safety vest is engineered for maximum protection in demanding environments such as construction sites, roadside emergencies, and surveying. Constructed from 100% lightweight polyester knitted fabric, it offers exceptional breathability and comfort for all-day wear. The design features high-intensity reflective strips providing 360° visibility to significantly reduce accident risks in all weather and lighting conditions.

Visibility & Safety

Reflective Configuration

- Two vertical reflective strips on front and back
- Two horizontal reflective strips on front and back
- 2-inch strip width for maximum visibility
- 360° high-intensity reflection coverage

Material & Construction

Material Properties

Low-elastic knitted fabric, Air-permeable, Non-ironing, Soft & Smooth, Lightweight

Durability & Design

Enhanced Durability

- Reinforced edge cloth wrapper for wear resistance
- Front zipper closure for easy on/off
- Fixed Velcro attachments
- Hemming fixed edges

Sizing & Fit

Available Sizes

L • XL

Sizing Recommendation

Size up 1 size for a slimmer fit; 2-3 sizes for a looser fit over clothing.

Applications

Recommended Applications

Construction, Surveying, Roadside Emergency, Bicycling, Industrial Safety
