

High-Visibility LED Safety Beacon

This LED beacon is designed for high visibility and reliable performance. Its compact design allows for easy installation in various locations.

Product Overview

High-Visibility LED Safety Beacon

This LED beacon is engineered for high visibility and reliable performance in demanding environments. Utilizing energy-efficient LED technology, it provides a bright, attention-grabbing signal suitable for construction, traffic control, and emergency applications. Its durable construction, featuring a polycarbonate dome and nylon/rubber base, ensures longevity, while the compact design allows for versatile installation.

Technical Specifications

Working Voltage

12 V DC
Voltage

24 V DC
Voltage

Waterproof Rating

IP69K

Operating Temperature

-30 to +60

Construction & Materials

Base Material	Nylon / Rubber
Dome Material	Polycarbonate
Lamp Type	LED

Features

Key Features

- Energy-efficient LED technology
- High-visibility signal output
- Compact design for easy installation
- Simple on/off switch operation

Model Number

EA9815B
