Product Overview

High-Visibility Safety Marking

This professional-grade PVC warning tape is engineered for high-visibility hazard identification and floor marking in industrial environments. Featuring a durable PVC soft film backing coated with natural rubber, it provides excellent adhesion, water resistance, and slip-resistant properties. Its versatile design makes it an essential tool for marking dangerous locations, directing traffic, and enhancing safety in factories and construction sites.

Technical Specifications

Thickness Range

0.13 mm

Min Thickness

0.2 mm

Max Thickness

Performance Features

- Bright, high-visibility colors
- Waterproof construction
- Non-slip surface
- Strong viscous force/adhesion
- Resistant to peeling

Material Composition

PVC Soft Film, Natural Rubber Adhesive
