Overview

High-Visibility Professional Safety Vest

This professional-grade safety vest is designed to maximize visibility and reduce accident risks in demanding work environments. Constructed from 100% breathable polyester fabric, it features high-intensity reflective strips that provide 360° coverage for safety during both day and night. The lightweight design and reinforced edges ensure long-lasting durability and comfort for construction, surveying, and roadside emergency applications.

Material & Construction

Detail view showing the breathable knitted fabric and reinforced wrapper edges for increased durability.

Fabric Weight

100 g

Material Density

Durability Features

- Low elastic knitted fabric for softness
