

High Visibility Reflective Safety Vest

This high visibility reflective safety vest is designed to enhance visibility in low-light conditions. Constructed from durable, lightweight fluorescent yellow fabric, it features reflective stripes across the chest, back, and shoulders for increased visibility.

Product Overview

High Visibility Safety Solution

This high visibility reflective safety vest is expertly designed to maximize wearer visibility in low-light and hazardous environments. Constructed from durable, lightweight fluorescent yellow fabric, it ensures both longevity and comfort for long shifts. The vest features strategically placed reflective stripes across the chest, back, and shoulders, making it an essential safety requirement for construction workers, traffic controllers, and site personnel.
