

High-Visibility Reflective Safety Vest

This high-visibility safety vest enhances visibility in low-light conditions. It is made from durable, breathable fluorescent yellow mesh fabric and features reflective stripes for 360-degree visibility.

Product Overview

High-Visibility Safety Vest

This high-visibility safety vest is designed to enhance visibility in low-light conditions and hazardous environments. Constructed from durable, breathable fluorescent yellow mesh fabric, it ensures comfort and longevity for the wearer. The vest features reflective stripes across the chest and shoulders for 360-degree visibility, making it an essential safety item for construction workers and traffic controllers.
