

High-Voltage Automotive Relay

This is a high-voltage relay designed for automotive applications. It is suitable for use in automotive instrument systems.

Product Overview

High-Performance Automotive Relay

This high-voltage automotive relay is designed to handle demanding electrical loads with reliability and precision. Engineered for robust performance, it features a durable cylindrical housing with integrated flange mounting for secure installation in automotive instrument systems. Its construction ensures stable operation under high-temperature conditions, making it a dependable component for critical vehicle electrical circuits.

Electrical Specifications

Rated Current

100 A

Rated Current

Rated Voltage

12 V

Design & Construction

Temperature Resistance

High-Temp

Mounting Style

Flange mounting

Housing Shape

Cylindrical
