

High-Volume Water Transfer Pump

This water pump is a robust and efficient solution for various water transfer applications. Featuring a durable frame for protection and portability, it is designed for high-volume water displacement, making it suitable for irrigation, drainage, and general water management tasks.

Overview

High-Volume Water Transfer Performance

This robust water transfer pump is engineered to deliver high-capacity fluid movement for demanding irrigation and drainage tasks. Powered by a reliable 9hp gasoline engine, it ensures consistent operation in various environments. The durable design features a protective frame that enhances both site portability and long-term equipment stability.

Technical Specifications

Engine Type	177F Gasoline Engine
Power Output	9 hp
Engine Displacement	270 ml
Inlet/Outlet Diameter	100 mm

Performance Metrics

Max Flow Rate

70 m³/h

Flow Rate

Maximum Lift	26 m
