

Highway Asphalt Road

This is an asphalt road designed for highway use. It incorporates traffic barriers to enhance safety and manage vehicle flow.

Product Overview

Professional Asphalt Road Infrastructure

This high-grade asphalt road solution is engineered for durability and reliability in expansive, long-distance infrastructure projects. Designed to withstand harsh environmental conditions, the surface provides a stable and consistent travel path suitable for high-traffic desert and arid landscapes. With clear, high-visibility markings and robust construction, it meets the rigorous demands of modern civil engineering.

Technical Specifications

Safety Markings

- Solid white edge lines
- Dashed yellow center lines

Infrastructure Metrics

2 lanes

Traffic Lanes

Road Configuration

Two-way traffic, Highway grade, Arid terrain compliant
