

Hoist Trolley for I-Beams

This hoist trolley is designed for easy attachment to I-beams and other structural supports. It provides a secure suspension point for hoists, enabling smooth and controlled movement of heavy loads along the beam.

Product Overview

GCT 610 Series Hoist Trolley

The GCT 610 Series hoist trolley is a versatile lifting tool engineered for easy attachment to I-beams and other structural supports. Designed for industrial, construction, and manufacturing environments, it provides a secure and reliable suspension point for hoists, enabling smooth and controlled movement of heavy loads. Its adjustable design ensures compatibility with various beam sizes, while the high-strength construction offers exceptional durability for demanding material handling tasks.
