Product Overview

Professional Grade Polypropylene Ski Rope

This high-performance hollow braided rope is engineered specifically for water skiing and demanding outdoor activities. Constructed from durable PP monofilament, it features a lightweight, hollow braided design that delivers excellent strength and flexibility. The material is inherently resistant to aging and corrosion, with a non-absorbent nature that ensures it stays light and manageable even when used in water.

Technical Specifications

Material	PP Monofilament
Construction	8 Carrier Hollow Braided
Material Properties	Anti-aging, Corrosion Resistant, No Water Absorption

Logistics and Variations

Color Options
