

Home Espresso Machine with Milk Frothing

This espresso machine maintains constant pump pressure at 15 bar. Its removable drip tray and translucent 1.25L water tank simplify cleaning and refilling.

Overview

Professional Home Espresso Experience

This home espresso machine is designed to deliver a barista-quality experience with a consistent 15-bar pump pressure, ensuring optimal extraction for rich, flavorful coffee. Featuring a durable stainless steel control panel and a sleek black injection-molded housing, it combines aesthetic appeal with practical functionality. With a generous 1.25L removable water tank and versatile compatibility for both coffee grounds and coffee pads, it is an efficient solution for daily espresso, cappuccino, and latte preparation.
