

# Home Fitness Motorized Treadmill

This motorized treadmill is designed for home fitness use. It features a digital display for monitoring speed, time, distance, and calories burned.

## Overview

### Home Fitness Solution

This motorized treadmill is an efficient solution for home fitness, designed to support walking, jogging, and running exercises. It features a robust 1.5HP motor and a cushioned running surface for a comfortable workout experience. With integrated technology like an MP3 player, iPad holder, and 12 preset programs, it offers a comprehensive training environment while remaining space-efficient due to its hydraulic soft-folding system.

## Performance & Technical
